

POWER SHUTOFFS IN ALL RESIDENTIAL UNITS

Attention all Evo Residents and Homeowners,

The installation of new sub-metering system that will allow the Association to bill back electricity based on actual consumption to each unit is underway. In order to connect equipment to each unit's electrical system, the project now requires **power shutoff on each floor during one day** from **10:00 AM – 2:00 PM**. Please review below schedule. Power will be restored each day as soon as work is completed, which may be before 2:00 PM.

Every effort will be made to restore power as soon as possible.

During power shutoff hours, residential units on affected floor won't have electricity, including interruption of internet services. If you refrain from opening the refrigerator door, temperature inside the refrigerator should not fluctuate. We recommend charging your electronic devices in advance. Also, shut down computers without a backup power source before the power is interrupted.

The fire life safety systems will continue to operate during power shut off. Lights in common area corridors will remain operational and elevators will continue to function normally. If necessary, amenities on the rooftop level will be available during each power shut off.

Floor	Date	Floor	Date
Townhome & Penthouse units	Mon, April 16, 2018	12 th	Mon, April 30, 2018
